

Get your Closet Organized

Step-by-Step

Step 1

Sort through all items and decide what to keep, donate or toss.
Print the signs on the following pages to clearly mark each pile.

Donate

Ke ep

2

Step 2

Organize the items you want to keep into categories.
List the categories and the items in each category on the next page.

Step 3

Go back to the lists and add the ideal storage solutions for each category.

Step 4

On the next page, list the storage solutions you would like to buy and see if they are within your budget.

5

Step 5

Decide which storage solutions you will purchase. Map out each storage item on the next page to see where you will place it and how many of each item you can fit in your closet. Update the list of items you will buy if necessary.

Sketch of my Closet

Step 6

Use the storage solutions you have and purchase what you need.

Step 7

Pack everything in its designated spot.

Step 8

If you have stored items in closed boxes or items that are not easily accessible then make an inventory. Right now you remember what you put where but if you are anything like me you won't remember a few months from now.
